

How to Add the Drupal Publisher Plugin

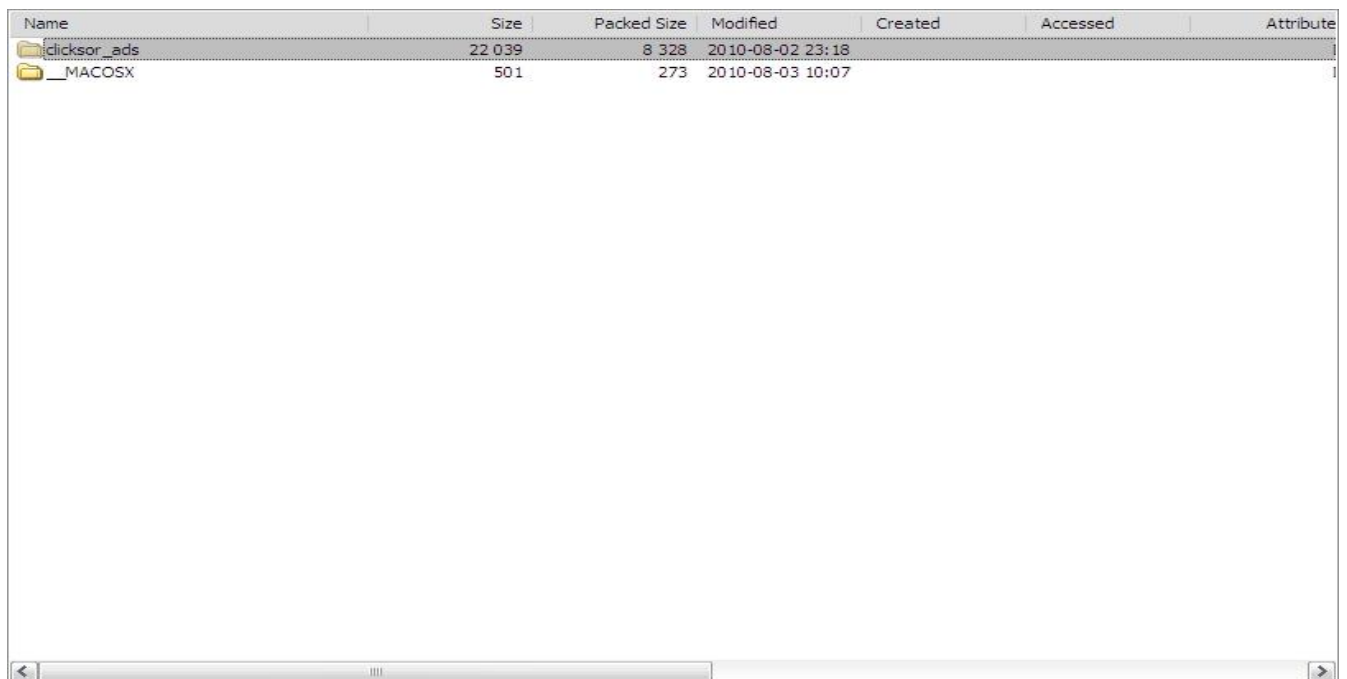

With Clicksor's Drupal Plugin, monetizing your website is just a few clicks away. Add inline text ads and popunder ads and customize your site easily. With the Drupal Plugin, you can:

- Add the Clicksor tag to all your pages in one click
- Block ads from appearing on particular pages
- Display ads only to non-registered users
- Enable/Disable ads from polls, search results or forums

Once you have downloaded the Drupal Plugin file from your Publisher account, add the plugin by following these 4 steps.

Step 1: Download Drupal Plugin from your Publisher account.

Step2: Extract module files to 'sites/all/modules/clicksor_ads'.

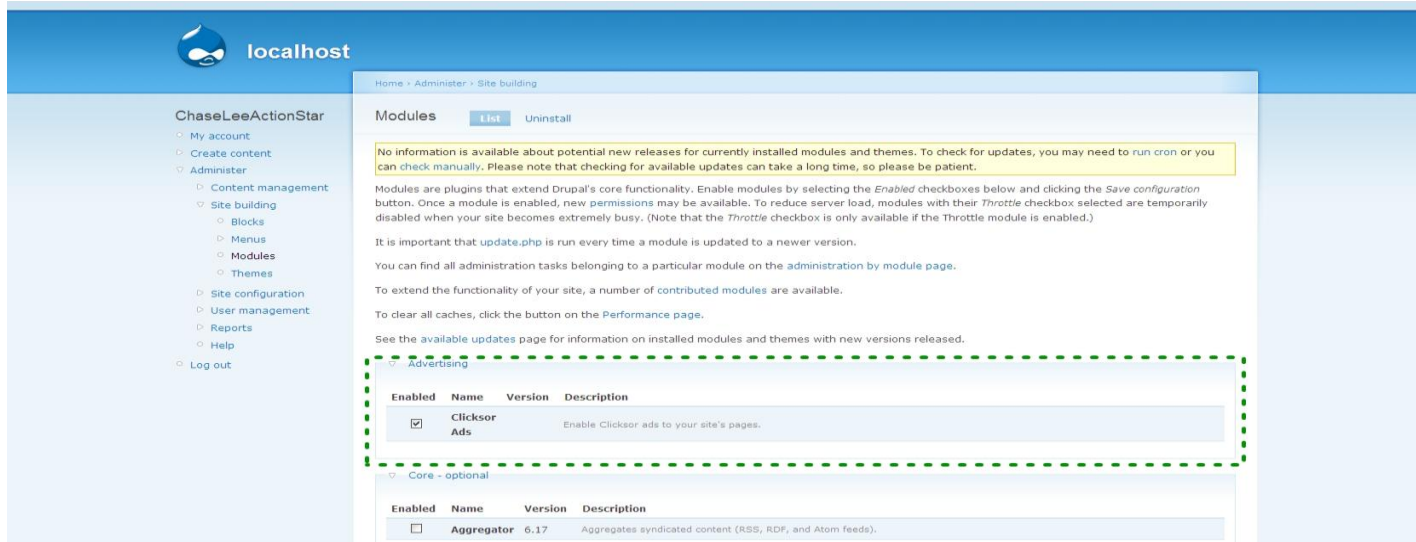

The screenshot shows a file explorer window with a table of files and folders. The table has columns for Name, Size, Packed Size, Modified, Created, Accessed, and Attribute. The files listed are 'clicksor_ads' and '_MACOSX'.

Name	Size	Packed Size	Modified	Created	Accessed	Attribute
clicksor_ads	22 039	8 328	2010-08-02 23:18			
_MACOSX	501	273	2010-08-03 10:07			

Step 3: Enable 'Clicksor Ads' in your Module settings for your Drupal account.

1. Click on Administer>Site Building>Modules.

2. Select Clicksor Ads to enable.

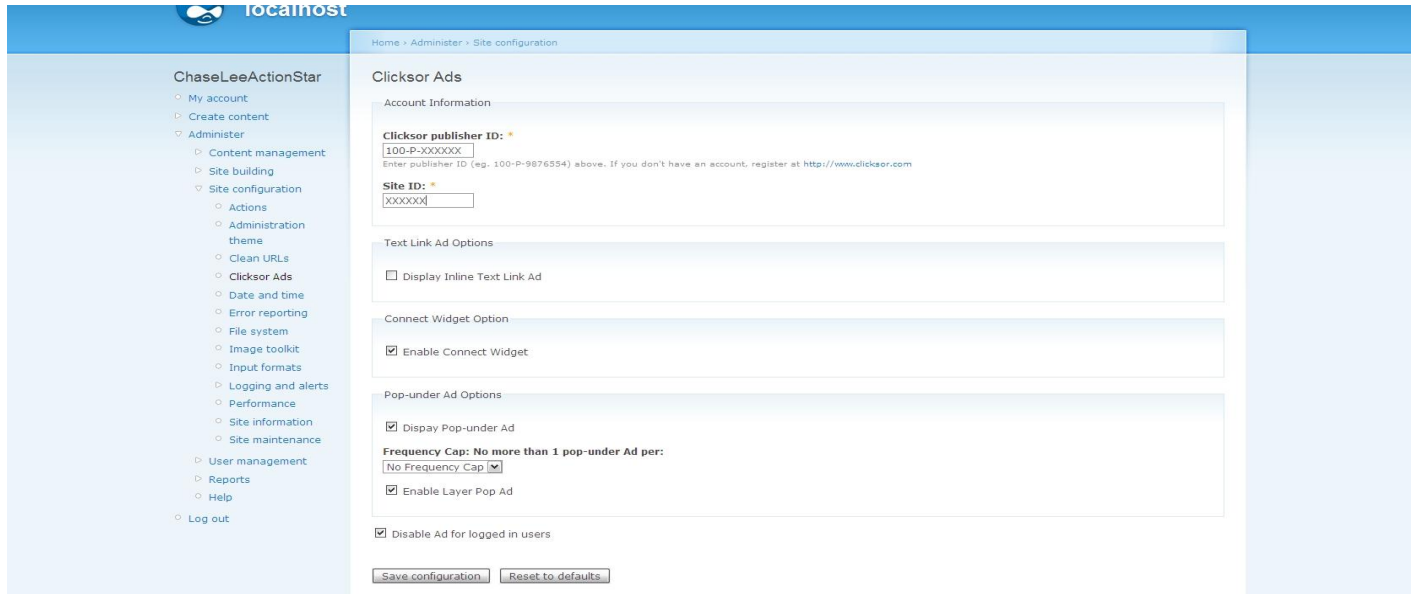

The screenshot shows the Drupal 7 Modules administration page. The left sidebar contains a navigation menu with 'ChaseLeeActionStar' at the top, followed by 'My account', 'Create content', 'Administer', 'Content management', 'Site building', 'Menus', 'Modules', 'Themes', 'Site configuration', 'User management', 'Reports', 'Help', and 'Log out'. The main content area is titled 'Modules' and includes a 'List' button and an 'Uninstall' button. A yellow warning box at the top states: 'No information is available about potential new releases for currently installed modules and themes. To check for updates, you may need to run cron or you can check manually. Please note that checking for available updates can take a long time, so please be patient.' Below this, there is explanatory text about modules and updates. A table lists installed modules, with 'Clicksor Ads' highlighted by a green dashed box. The table has columns for 'Enabled', 'Name', 'Version', and 'Description'. The 'Clicksor Ads' row shows the 'Enabled' checkbox checked. Below the table, there is a section for 'Core - optional' modules, including 'Aggregator'.

Enabled	Name	Version	Description
<input checked="" type="checkbox"/>	Clicksor Ads		Enable Clicksor ads to your site's pages.
<input type="checkbox"/>	Aggregator	6.17	Aggregates syndicated content (RSS, RDF, and Atom feeds).

Step 4: Configure your Clicksor Ads module.

1. Click on Administer>Site Configuration>Clicksor Ads.
2. Select the types of ads that you want on your site.
3. Click Save Configuration to set the ads.

The screenshot shows the Drupal 7 Clicksor Ads configuration page. The left sidebar is the same as in the previous screenshot. The main content area is titled 'Clicksor Ads' and contains several sections: 'Account Information' with fields for 'Clicksor publisher ID' (containing '100-P-XXXXXX') and 'Site ID' (containing 'XXXXXX'); 'Text Link Ad Options' with an unchecked 'Display Inline Text Link Ad' checkbox; 'Connect Widget Option' with a checked 'Enable Connect Widget' checkbox; 'Pop-under Ad Options' with checked 'Display Pop-under Ad' and 'Enable Layer Pop Ad' checkboxes; and a 'Frequency Cap' dropdown menu set to 'No Frequency Cap'. At the bottom, there is a checked 'Disable Ad for logged in users' checkbox and two buttons: 'Save configuration' and 'Reset to defaults'.

Congratulations! Now go and enjoy increased earnings for your site.
